AI and Data Strategist

What's Your Setup?

Chicago, September 1st, 2026

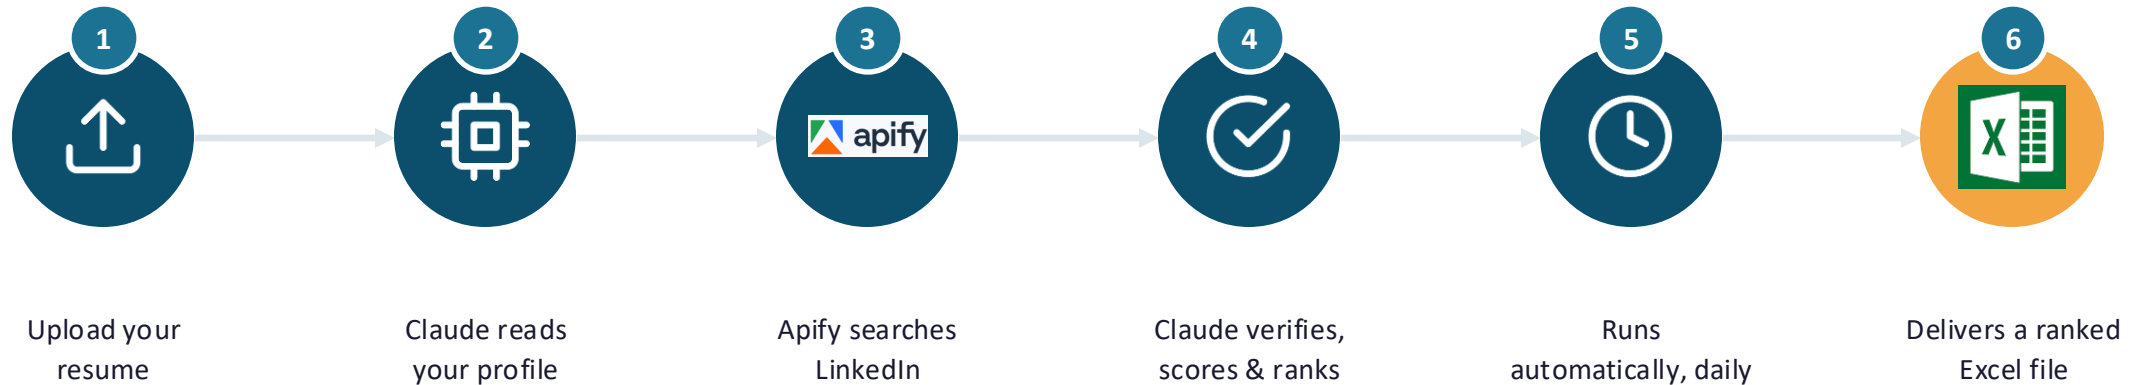

**My job search used to start with
filters and endless scrolling**

THE SOLUTION

How MatchFirst Works

One prompt. One schedule. A fresh, vetted list every morning.

Output: two linked worksheets + methodology

Jobs: verified roles ranked by profile fit, with match score, key strengths, missing requirements, and Apply / Consider / Do Not Apply recommendation

Contacts: relevant recruiters and talent leaders connected to those roles, prioritized by relevance and recent LinkedIn activity

Search Notes & Methodology: search criteria, scoring approach, verification rules, and limitations

What's Actually Under the Hood

Claude Desktop

An AI assistant you talk to in plain language. It can read a document, like your resume, reason about what matters in it, and, through connectors, take real actions instead of just chatting back.

Apify

A platform of pre-built bots (“Actors”) that go out onto real websites, like LinkedIn, and pull back structured, up-to-date data on demand.

Claude thinks. Apify fetches. *Together, they do the searching for you.*

TRY IT YOURSELF

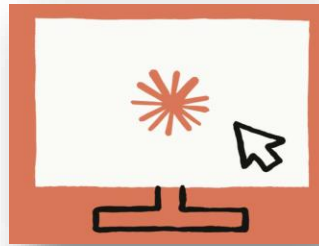

Getting It Running 1/2

About 10 minutes. No code.

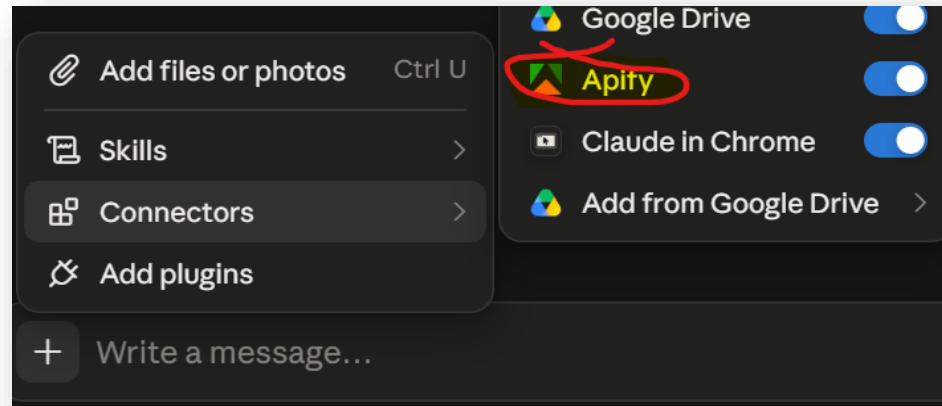

Install Claude Desktop

Download it free at claude.ai/download

Add the Apify connector

Connectors → turn on Apify

TRY IT YOURSELF

Getting It Running 2/2

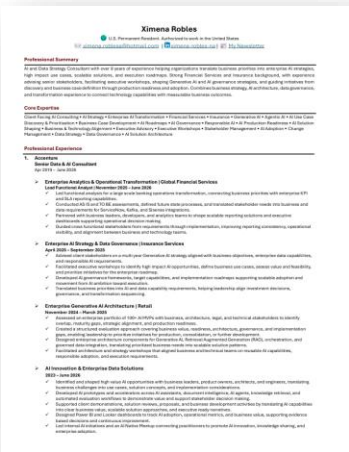

About 10 minutes. No code.

Attach your resume + paste the prompt
Saved as your project's instructions — Claude reads it before every run.

Schedule it to run daily
Scheduled tasks → new task → every day, 7am

Set project instructions

Provide Claude with relevant instructions and information for chats within LinkedIn Job Search. This will work alongside your [profile instructions](#) and the selected style in a chat.

My resume is attached. Use it as the primary source to understand my professional profile, including my skills, years of experience, previous roles, industries, education, certifications, seniority, and career direction.

Using Apify, search LinkedIn for jobs posted within the past 24 hours in CHICAGO, Illinois, USA, including hybrid and remote opportunities available to candidates based in CHICAGO.

Focus on roles such as:

- Generative AI Consultant
- GenAI Consultant
- AI Consultant
- AI Strategy Consultant
- AI Transformation Consultant
- AI Solutions Consultant
- AI Analyst

NOT A MOCKUP

MatchFirst in Action

A real session, six steps from the workflow, live.

The screenshot displays the MatchFirst AI interface with a dark theme. At the top, a breadcrumb navigation shows 'LinkedIn Job Search' and 'Job test run'. The main workspace contains a text prompt: 'I'll get started — searching LinkedIn for AI/GenAI consulting roles posted in Chicago in the last 24 hours, scoring them against your resume, finding relevant recruiter contacts at each company, and packaging it all into an Excel file. This will take a few minutes.' Below the prompt, a status bar indicates 'Updated tasks, loaded tools, used a tool'. The workflow is visualized with two 'Call Actor' nodes connected by a vertical line. A progress indicator shows 'Working through a complex response...' with a 4m 23s timer. On the right, a sidebar contains a 'Progress' section with six numbered steps: 1. Finding Apify actors, 2. Run LinkedIn job search for Chicago (past 24h), 3. Evaluate jobs against resume & score, 4. Find relevant contacts per company via Apify, 5. Build formatted Excel deliverable, and 6. Deliver file to user. Below this is an 'Outputs' section and a 'Context' section showing 'LinkedIn Job Search' and 'Apify' connectors. At the bottom, a message box suggests asking Claude to edit the file instead of making a new one, with an 'Add to message' button.

LinkedIn Job Search / Job test run

Updated tasks, loaded tools, used a tool

I'll get started — searching LinkedIn for AI/GenAI consulting roles posted in Chicago in the last 24 hours, scoring them against your resume, finding relevant recruiter contacts at each company, and packaging it all into an Excel file. This will take a few minutes.

Used Apify integration, updated tasks, loaded tools

BEYOND JOB SEARCH

Make It Yours

The MatchFirst workflow can do more than job search

Job Search

This talk. Find roles that fit — and the people who could hire you.

Sales Leads

Find prospects on LinkedIn who match your ideal customer profile.

Intentional Networking

Find and track people worth reconnecting with — on purpose.

Same prompt skeleton, swap the profile, the criteria, or the platform, and the engine still runs.

What It Costs to Run

Less than one hour of billable time, per month.

Claude Pro

\$20/mo

Needed to use connectors like Apify.

Apify

\$0–\$29/mo

Free tier usually covers a daily search.
Starter plan if you scale up.

TOTAL, ROUGHLY

\$20–\$49

per month

vs. one evening a week lost to manual searching and sorting.
